Outsourcing Services

IT Infrastructure Outsourcing when managed and executed properly enables organisations to leverage IT expertise and best practices while driving down costs. At NOOR we've been successfully managing complex, mission critical infrastructures for over a 5 years. We understand your need for control and data confidentiality while taking care of the technical complexities and business needs to ensure we meet the SLA's you set.

We undertake outsourcing using the NOOR Outsourcing Model of Environmental Study, Mobilize, Operate and Improve. The operation is managed and controlled through NOOR's Project Management and Quality Assurance Services. This combined with the NOOR Solutions Kingdom-Wide Support Service; enable our experts to strive for 24-7 infrastructure availability year-in, year-out.

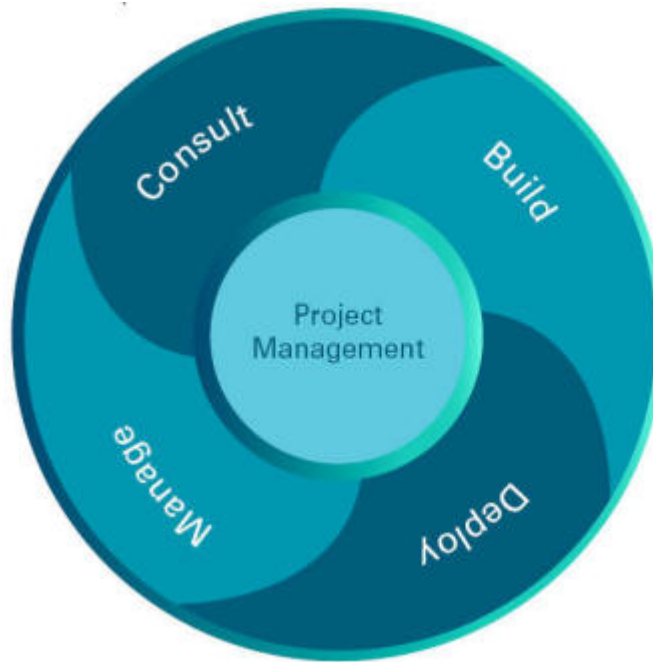

Below is a summary of the Outsourcing Services we offer

- Operation Management
- Technical Support
- Global Sourcing

Success Formula

Perhaps the **greatest advantage** of our extensive experience and expertise across different sectors, products and geographical locations is our ability to build a delivery model which caters for the local needs of our clients while incorporating international best practices:

The NOOR Solutions **Delivery Methodology** from Consult to Manage delivers the end-to-end solutions that you require.

Clients

Noor Solutions is constantly developing and improving the strategy of its IT business solutions and services offering to meet customers specific business needs so that they can outperform their competitors. Our experienced and highly trained teams of professionals across all business sectors are at your service offering the latest developments in technology and introducing them without delay reinforcing the principle of "state of the art".

We maintain close relationships with our clients from initial discussions through to the implementation stage and final delivery which guarantees the high standards that are expected of our range of products and services. Our objective and focused approach to each particular need enables us to provide our customers with vendor neutral recommendations.
